

FOR IMMEDIATE RELEASE:

iFAX Solutions Acquires AvantFAX Web Interface for HylaFAX

Philadelphia, PA - Sept 11, 2007 – iFAX Solutions, the world's leading provider of hardware, software, service, and support for enterprise users of HylaFAX fax software, announces the acquisition of AvantFAX, a web application for managing HylaFAX servers.

“AvantFAX is one of the most exciting products emerging from the HylaFAX development community in recent years, and we’re excited to help take it to the next level,” said Darren Nickerson, founder and President of iFAX Solutions. “Our company was founded to help promote the use of HylaFAX in the commercial sector, and to help foster innovation and advancement of this Open Source software by funding development efforts. This is another opportunity for us to drive that mission forward and help provide the world with an easy, intuitive interface to help them harness the true power of HylaFAX.”

HylaFAX is powerful, highly configurable, and incredibly stable and has long been considered the solution of choice to integrate fax capability into UNIX-based systems. The acquisition of AvantFAX will help iFAX Solutions deliver a more user-friendly product.

“iFAX Solutions shares my vision of making AvantFAX the most popular web application to manage HylaFAX servers,” said David D. Mimms, Jr., founder and President of MENTALBARCODE Software, LLC. “As the principal author of AvantFAX and with their support, we can dedicate time and energy to realize the full potential of this software. We look forward to working with some of the largest users of HylaFAX worldwide to include additional features and functionality in future software releases.”

About iFAX Solutions: iFAX Solutions (www.ifax.com) was founded in 2002 by core members of the HylaFAX Open Source community, and is a worldwide leader in providing mission-critical fax, voice and voice-over-IP (VoIP) solutions. iFAX bases its custom fax solutions on HylaFAX (www.hylafax.org), an enterprise-class fax server and the de-facto standard for faxing on UNIX/Linux systems. Their Telephony Depot division (www.telephonydepot.com) is a leading provider of hardware for use with Asterisk (www.asterisk.org), the leading Open Source telephony toolkit for building phone systems.

About AvantFAX: AvantFAX is a web application developed by MENTALBARCODE Software, LLC for managing the popular HylaFAX enterprise-class fax server software. It was created to give HylaFAX administrators and their users an easy-to-use interface to view, send, and archive faxes in PDF format. It also allows administrators to manage user accounts, transmission channels, fax archive categories, and much more.
