

## HylaFSP Fax Client Windows Fax Client for HylaFAX Product Data Sheet

### + Fax from any application

With HylaFSP, sending a fax is easy. Users can fax from any application they can print from.

### + Address book integration

HylaFSP can access both the Windows and Outlook address books. Sending a fax to multiple recipients is as simple as selecting them from your address book.

### + Windows integration

HylaFSP, available for Windows workstations and servers, is the only HylaFAX client to integrate with Microsoft Fax Services. This means little to no training is necessary for most users.

### + Sent Fax Archive

Sent faxes are automatically archived locally for later retrieval. Sort by send date, recipient, document name and more.

### + Coverage Editor

Use Windows built-in editor to create, save and modify your fax coverpages.

### + Send Fax Wizard

Sending a fax is simple with HylaFSP and Windows. Faxing is wizard-based and user-friendly.

### + Multiuser Capable

HylaFSP supports individual user profiles and runs under Windows Terminal Services.

iFAX Solutions strives to provide our users with the best possible HylaFAX experience. With HylaFSP that's exactly what you get. The power of HylaFAX from the desktop, backed by the world's leading HylaFAX engineers.

iFAX Solutions was founded with the goal of providing the best HylaFAX experience possible to our customers. An integral part of this is the ability to fax from the desktop. Although HylaFAX has been freely available since 1991, iFAX saw the need for a user-friendly HylaFAX client for use in an office environment. Most of the clients available prior to HylaFSP were originally designed by and built for HylaFAX developers. This "by developers and for developers" mentality led to some fax clients that, although full-featured, can be a bit daunting for the average user.

HylaFSP was born of this goal: that any Windows user should be able to easily send a fax via their company's HylaFAX server. We surveyed our customers to find out what would be important to them in a fax client. Ease of use, full integration with Windows, and address book support were some of their requests. iFAX Solutions made HylaFSP easy to configure – server settings are entered via the HylaFSP control panel. Address book support is also included; HylaFSP users can access either their Windows or Outlook address book to select fax recipients. Most importantly, HylaFSP is completely integrated with Windows; you can fax from any application you can print from by following Microsoft's own Send Fax Wizard.

Unlock the power of your HylaFAX server today... with HylaFSP!

# With HylaFSP, sending a fax via your HylaFAX server is easy.

## Users can fax from any application they can print from.

### ■ Key Features
